

# LRS Federal Project Description

## *Guaranteed Compliance*

Based on the performance-based approaches and successes realized in the remediation program, LRS Federal conceived of a new approach for addressing environmental compliance at federal installations. “Guaranteed Compliance” is an innovative approach to simultaneously address an installation’s environmental compliance posture and resource constraints. Guaranteed Compliance is a concept that involves a combination of process mapping, process improvement, and compliance tracking to significantly reduce the likelihood of noncompliance.

The project required LRS to review data gathered over the course of five years that included environmental Enforcement Actions, internal and external audit findings, personnel levels, project information, and other parameters. We developed a Systemic Cause analysis approach that categorized more than 5000 records and performed trends analysis across 16 Air Force installations within ACC. This approach led to the development of recommendations designed to reduce over 40% of all root causes of

environmental noncompliance through optimization of government resources, contract support, and performance tracking through management indicators.

Once completed, LRS was asked to evaluate one Air Force installation (Moody AFB, GA) to provide recommendations and cost estimates for implementation of the proposed approach.
