

LRS Federal Project Description

Stormwater Program Support

LRS provided on-site support and management for the Buckley AFB storm water program. Due to significant construction activities, a municipal separate storm sewer (MS4) permit, and other activities, requirements exist under this program to maintain a proactive compliance posture. LRS was responsible for overseeing the storm water sampling, reviewing analytical results and preparing the required monitoring reports for submission to the regulators.

Other work efforts performed under this contract include:

1. Construction Storm Water Program Support – Developed Construction Permit Storm Water Pollution Prevention Plans for various construction projects across the base. We provide technical support and consulting to assist construction contractors in developing and maintaining compliance requirements. We also perform construction permit compliance monitoring to ensure regulatory compliance of the storm water program requirements.
2. Industrial Storm Water Support – LRS Federal conducted the annual Comprehensive Site Compliance Evaluation (CSCE) in accordance with the installation’s Multi-Sector General Permit. This evaluation documents the status of current operations, and updated the permit with any new facilities that may impact overall compliance.
3. Storm Water Environmental Planning – LRS also assisted the overall program through early identification of issues that could impact the installations compliance posture. This involved Work Order reviews, National Environmental Policy Act (NEPA) related reviews (AF813s, EAs), and review of project plans & specifications.
